

Cyber Security Awareness

Aim:

Introduce the dangers of the Internet in regards to the safekeeping of information.

Objective:

To teach the participants how to recognize cyber threats, follow best security practices and avoid common mistakes that may adversely affect the confidentiality, integrity and availability of information.

Participants' profile:

- Entrepreneurs
- Managers
- Business personnel
- IT users
- Students

Lecturer's Profile:

Vasilis Sikkis, BSc, MSc, OSCP

Vasilis is an information security professional with 3 years of experience in information security, risk management and penetration testing. He has participated in projects covering infrastructure penetration tests, web and mobile application security assessments, social engineering and red-team attacks as well as code and configuration reviews. He has also been involved in the implementation or review of ISO 27001 ISMS and GDPR engagements as well as risk analysis projects for private and public sector organizations.

Vasilis was the team captain of the Cyprus National ECSC team that competed in the European Cyber Security Challenge in 2017 against 14 other European countries and won the 5th place award. In his spare time, he performs vulnerability research and takes part in CTF hacking competitions.

Vasilis holds a Bachelor's degree in Computer Science from the University of Cyprus, a Master's degree in Cyber Security from the University of Birmingham and the Offensive Security Certified Professional (OSCP) certification.
